

Monitor Your Farm From Anywhere

Observant Image Capture Solution

Observant's Image Capture Solution allows you to:

Check back through recent photos on your smartphone

Get a photo update every two hours

Keep an eye on your property, even when you're not there

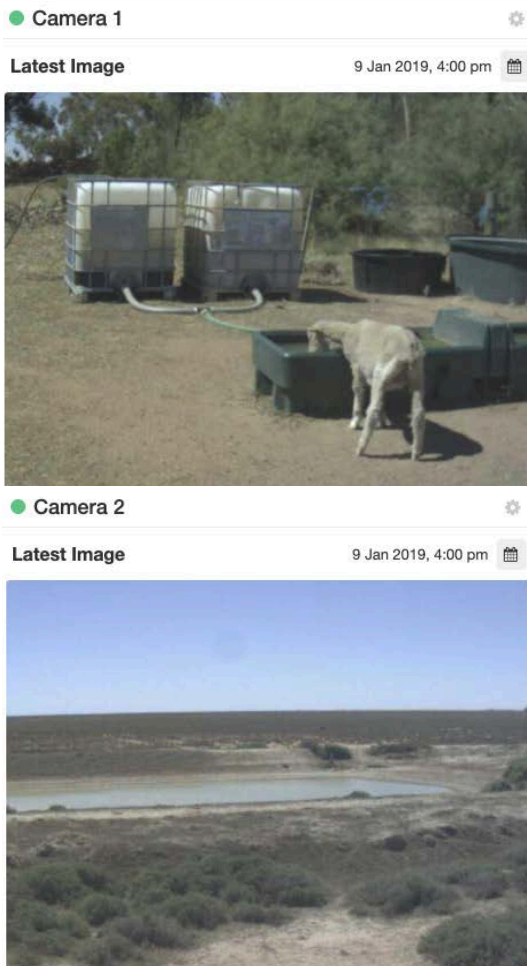

OBSERVANTTM
A JAIN IRRIGATION COMPANY

Image Capture Solution

See what's happening on your farm from anywhere

The Observant Image Capture solution lets you check what's happening at fixed points on your farm — from tank and trough water systems, to livestock at feeders, to open channel water levels. Access images through Observant Global, our web-based monitoring platform, which supports a wide range of complementary on-farm monitoring and control solutions.

Images Displayed in Observant Global

- 1 Nominate when you want photos taken **throughout the day**
- 2 Combine with any of our other solutions for **increased insights** into what's happening in the field
- 3 Know your livestock are safe and taken care of by **monitoring troughs** on hot days
- 4 Compare **current and recently** taken photos
- 5 Capture an image **whenever you want** through Observant Global's
- 6 **Identify leaks** and on site issues to save time, money and water

Hardware

This solution has been designed for simple installation, which typically takes under 30 mins.

It has been designed to withstand harsh weather conditions, and has a surveillance grade imaging sensor to prevent outdoor lighting from impacting the quality of the image. It also has a heating element in the lens to prevent fogging.

Additional sensors can be connected to the Observant C3+ including rain gauge, water level sensor or weather station.
